CASE STUDY with B-Cure Laser Sport Pro (32)

The Patient: 41 year old married man, father of three, active physical work.

Case Description:

Suffering from joint pain.

Pain and swollen knees, possible liquids, local fever and limited movement

Possible Osteoarthritis and rheumatoid arthritis.

Has been suffering from this for five years, has not been treated and is taking no medication.

Prognosis:

Cooling the area with ice, Acupuncture one a week

combined with B-Cure Laser Sport Pro treatment.

Treatment for 3 weeks:

The first treatment was in November 2014. Treatment lasted 1 minute and a half with B-Cure Laser Pro, during the first meeting only.

Treatment was combined with Acupuncture.

Following this the treatment with the device was for 7-8 minutes at each point of treatment.

The patient continued to use the device, administering to himself for 3 weeks, twice a day at home.

Results:

3 weeks after the first treatment the pain stopped, the swelling subsided; there was not accumulation of liquid in the joints and no limitation of movement.

My professional recommendation:

I recommend using B-Cure Laser Pro for acute problems of the joints.
