CASE STUDY with B-Cure Laser Sport Pro

The Patient: a 64 year old woman.

Case description:

Suffers from lower back pain radiating to her left hip, when standing and standing up from seated position.

Diagnosis:

Femoral Arthritis

L3-L4 prolapsed disc

S1-L5- prolapsed disc with directional changes

Prognosis:

Examination of the femoral hip joint showed limitation of movement, sensitivity and pain radiating to the groin.

Limited circumferential movement of the hip

Possible Femoro Acetabulas Ingingement

Was previously treated by a physiotherapist at the HMO clinic, with ultrasound and electrodes once a week with no improvement.

3 weeks of treatment:

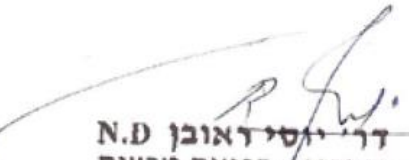

The patient was treated at my clinic "The Israeli Center of Natural Therapy" and was given osteopathic treatment in conjunction with Acupuncture and ultrasound for 1 week without any significant improvement.

Results:

After 10 visits the patient under my instruction, added treatment with the B-Cure Laser Sports Pro or an additional ten days/ After ten days significant improvement was achieved and complete elimination of the pain.

My professional recommendation:

In cases of inflamed joints, also involving the lower back, I recommend using the B-Cure Laser Sport Pro to facilitate and expedite the process of recovery.
